REBEKAH TOLIN, OTR/L  
LINDA HOWE, Perceptual Motor Consultant  
PAULINE WAIN, MS, SLP-CCC  
ERIC BORSTING, O. D. Professor, SCCO**

In many neurobiological and neurobehavioral disorders such as learning disabilities, ADD and ADHD, autism, dyslexia, and aphasia, the sensory systems of the body are compromised. Those sensory systems include not only vision, hearing, taste, touch and smell, but also balance, a sense of time, a sense of space, and a sense of humor.

Our panel of experts will discuss the remediation of these systems in order to better acquire the language skills, both verbal and visual, that are necessary for better, faster learning and function in the world.

**Fees: members, \$65, non-members, \$75 including lunch  
After Oct. 15: members, \$75, non-members, \$85  
Seating is limited. On-site registration, only if available**
